

The following Astava products are not electrical components and are manual operated:

Valves

Manifolds

Flanges

Seal/Drain pots

Air distribution manifolds

Flushing rings

Astava safety manifolds

Accessories

After analyzing these products the following is determined:

Under normal operation conditions a potential source of ignition will not occur for these products.

Therefore these Astava products are outside the scope of Guideline 2014/34/EU (ATEX 114) .

This statement is issued under the sole responsibility of the manufacturer,
